

DEPARTMENT OF ELECTRICAL AND ELECTRONIC ENGINEERING

FINAL YEAR PROJECTS 2025 - 2026

SN	Name	Matricule	Project Topic
1	ENOW PAUL EGBE	FE22A205	Design and implementation of an AI-based solution for network traffic analysis and anomaly detection
2	EYONG EFFA CHELSEA NSO	FE22A213	Design and implementation of an AI and IoT-based LPG Bottle Monitoring System
3	TSAFACK FABIOLA	FE22A320	Development of a Low-Cost Electronic Reader for Blood Glucose Detection
4	BESSONG MAXIME AYUKETANG	FE22A348	Development of an Enterprise Cloud Risk Management Platform Based on the Shared Responsibility Principle.
5	NJI NADAGE MUKEH	FE22A409	Design and Implementation of an IoT-Based System for Monitoring Epileptic Patients
6	NKENGAFAC NGEFAC	FE22A416	Design and implementation of an AI-based system for Predicting Health Crisis
7	OBIH DAVID CHIMAObi	FE22A421	Development of a High-Performance Computer using Nvidia Jetson Orin Nano modules.
8	SHINGO ELISABETH BIH	FE22A427	Design and implementation of Smart Farming System Leveraging Internet of Things and Machine Learning, and Transmission of Data over FM bands.
9	TAMBONG STERCY TAKEM	FE22A434	Design and implementation of an IoT-based Child Safety Tracking Device with Route Anomaly Detection
10	HERMINA CHANCELLE FEH MUFI	FE21A369	Design and Implementation of an IoT-Based Fetal Movement Monitoring System for Maternal Care.
